## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4, and 6, drawn to a galanin agonist medicament.

Group II, claim(s) 2-3, and 5, drawn to a method of treating a condition by the administration of a galanin agonist.

Group III, claim(s) 7-14, drawn to a transgenic mammal.

Group IV, claim(s) 15-17, drawn to an assay employing a transgenic animal.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions of Groups I-IV do not share the same or corresponding technical features because the feature which serves to unite the five inventive groups, galanin agonist, is known in the art and therefore cannot serve as a special technical feature. The "special technical features" means those technical features that define a contribution over the prior art (see MPEP 1850). Thus, the apparent "special technical feature" of these

claims cannot form a basis for Unity of invention. The special technical feature of Group II is the method, the special technical feature of Group III is the transgenic animal, the special technical feature of Group IV is the assay.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
